QUESTIONS DO REPEAT, THANK ME LATER 🙏

Interview Questions| Amazon -2022

There are a bunch of us preparing right now for interviews, [Leetcode](#) is a good source to look at the current level of questions. Below I will be sharing the list of questions currently being asked by Amazon in the last 3 to 4 months.

Graphs

[Process Ordering](#)

[Open in app](#)[Get started](#)

- [K jumps on Grid](#)

Trie

- [Finding Prefix in Dictionary](#)

Tree

- [Binary Tree Top Down View](#)
- Traversing binary tree in an outward manner.
- [Diameter of a binary tree](#) [Path is needed]

Sliding window

- [Contains Duplicates III](#)
- [Minimum Window Substring](#) [Variation of this question]

Linked List

- [Reverse a Linked List II](#)
- [Remove Loop From Linked List](#)
- [Reverse a Linked List in k-groups](#)

Binary Search

- [Search In rotate sorted Array](#)

Arrays

- [Max bandwidth](#) [Priority Queue, Sorting]
- [Next permutation](#)
- [Largest Rectangle in Histogram](#)

My observation

1. These questions seem to repeat at times. So It is worthwhile giving them a look.
2. DP “seems” to be dead. There are really simple questions being asked.
3. Graph BFS-DFS or grid-based questions have been there for almost everyone.
4. The level of questions in recent times is not going over Leetcode Medium. Instead, the focus is more on Clean coding.

Let me know in the comments if you need any help from me or you can ping me on [LinkedIn](#). Follow me for upcoming question sets from Airbnb and Meta. :)

In the meanwhile here is something else for you to read.
